Subject: Premium Share Growth  
To: Gawronski, Edward

Ed, we are making the following statment in our second-quarter earnings release:

82.8 As a percentage of shipments, premium-priced cigarette sales continued to grow, claiming 1.8% TK% of Philip Morris U.S.A.'s volume mix, a gain of TK points from last year. In comparison, the premium portion of U.S. industry sales rose TK% in the quarter, with Philip Morris accounting for TK% of that growth. 2.9%

48.8%  
Louis Camilleri believes our percentage of industry premium growth could be as high as 90%. He is meeting with Geoff Bible at 4 p.m. and would like to have this info at his fingertips. Thanks.
